Tax integration is both in-built and enabled through App based integrations as well.

Flexibility in choosing the tax service provider and the modes of tax calculations

29+ secure & scalable API end points

API response time of less than 50ms

Easy integration with third party tools

Features

Flexible rules configuration	Flexible rules mechanism to cater to complex tax calculations. Tax exclusions can be configured as per compliance needs.
Third Party Integration	Flexibility in the configuration enables businesses to toggle on/off built-in native features or to integrate with any third part vendor tool. The flexible rules help to choose tax provider of choice as per the right geography.
Fallback mechanism	In case of a failure in the third-party tax service, the system can fall back to the default tax payment processing.
Tax Computation	Ability to choose between a flat rate of tax or a flat percentage in the default tax processing and thereby enabling tax computation accordingly.
Third Party Apps	Extensions in tax service to support integration of third-party Apps via Infosys Equinox App Marketplace. Currently supports App based integrations like Avalara.

About Infosys Equinox

Infosys Equinox is a future-ready digital commerce and marketing platform built using Microservices-based, API-first, Cloud-native, Headless and eXtensible (MACH-X) architecture that enables businesses to drive human-centric experiences for their customers across touch points.
